## Key to Process Codes

**1 - Liquid CO2** (includes the use of entrainers with CO2 which are in some cases found within the final product eg. Ethyl Alcohol)

**2 - High Vacuum Distillation**

**3 - Solvent Extraction (including water)** (product is in solution in the solvent(s))

**4 - Molecular Distillation**

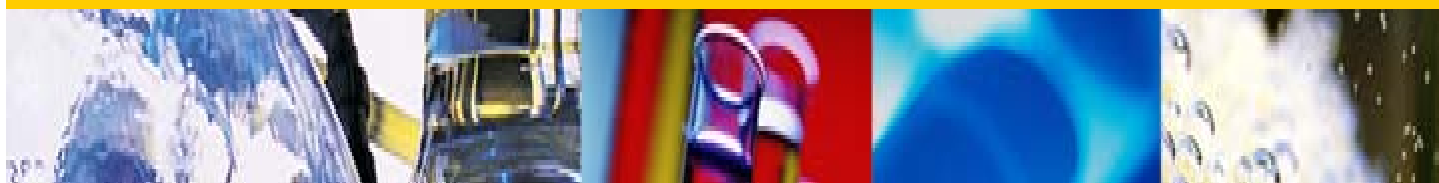

**5 - Solvent Extraction (including water) then concentrated or part concentrated** (solvent(s) partly or wholly removed by distillation to a resinous product)

**6 - Alcohol co-Distillation** (product is a 'water white' alcoholic distillate)

**7 - Counter Current**

**8 - Hot Water Infusion** (specific to tea and coffee for creating beverage flavour extracts)

**9 - Solvent-Free Oil Extraction**
